

SL871L-S GPS module

Product description

The SL871L-S is the companion GPS variant of the SL871L GNSS module. The SL871L-S is designed to comply with both GPS and QZSS constellations and is pin-to-pin compatible with the xL871 Family (SL871L, SL871, SL871-S).

The SL871L-S is encased in a 9.7 x 10.1 mm LCC package and includes an ARM7 baseband processor, embedded ROM memory and SAW filter. Unlike the standard SL871-S, the new SL871L-S embeds also an additional LNA and a DC block. The additional LNA boosts RF sensitivity, TFF and the DC block allows direct active antenna input for a seamless integration.

SL871L-S delivers positioning data via standard UART and secondary UART is also available. The SL871L-S supports ephemeris file injection (A-GPS) as well as Satel-lite Based Augmentation System (SBAS) to increase posi-tion accuracy. It also features very low power consumption in all operating conditions, optimized for long battery life applications. The SL871L-S is designed to ensure hardware and software compatibility with the previous SL871-S and all the other xL871 modules which allows development of single application, circuit and PCB design efforts for use with either product.

Key Benefits

- Based on the Mediatek MT3337E core
- GPS, QZSS
- Supply voltage range: 2.8 4.3 VDC
- High sensitivity
- Low Power consumption
- Assisted GPS
- Jammer rejection
- 1Hz to 10Hz Navigation
- 2 UART's

Family concept

Our positioning product portfolio is the result of over twenty years of experience in GNSS applications. Telit has developed a range of products compatible with the well-known GPS constellation as well as its Russian counterpart GLONASS. Our portfolio is fully aligned with the upcoming service launch of Europe's Galileo constellation.Important features such as Dead Reckoning, Precision Timing, as well as speed and reliability assured by multiconstellation coverage, provide additional benefits for your application.

Your application development effort can also benefit significantly from the seamless integration with Telit cellular modules. This bundling of cellular and positioning modules significantly reduces development complexity without adding costs. Multi-constellation positioning products applied together with our eCall/ERA-GLONASS compliant cellular modules bring you ready-to-use emergency automotive tracking solutions for the European and Russian markets.

Typical applications include fleet management systems, European GPS-assisted road tolling systems, cellular base stations, in-car navigation systems, automotive telematics systems and GPS-based personal sports training monitors. **Combine** your GNSS module with

SL871L-S

GNSS family comparative table

Model	Constellations				Interfaces		Features				
	GPS/ QZSS	GLONASS	GALILEO	BDS	UART	I2C	LNA	DC block	Ant ON	Ant sense	Flash
SL871	•	•	•	•	•	0			•	•	•
SL871L	•	•	•	•	•	0	•	•	•	•	•
SL871-S	•				•				•		
SL871L-S	•				•		•	•	•		

Product Features

- Frequency Band: GPS (L1), QZSS (L1)
- Standards: NMEA
- 66 search and 22 tracking channels
- Configurable fix reporting. Default: 1Hz, Max: 10 Hz
- A-GPS: local ephemeris prediction
- Jammer rejection
- DC-DC block + Additional LNA

Environmental

- 10.1 x 9.7 x 2.4 mm, 18-pad, Industry Standard LLC castellated edge package
- Surface mountable by standard SMT equipment
- Weight: 1 g
- Temperature Range:
 - Operating temperature: -40 to +85°C - Storage temperature: -40 to +85°C

Interfaces

- 1PPS output for precise timing
- 1+1 UART port

Approvals

- RoHS compliant
- RED

Electrical & Sensitivity

- Power supply:
- VCC: 2.8 4.3 V
- Typ: 3.0 3.6 V
- Current consumption: GPS
 - Acquisition: 61 mW
- Tracking: 54 mW
- Stand-by (Vbatt): 25 uW
- Sensitivity: GPS+GL0
- Acquisition: -148 dBm
- Navigation: -163 dBm
- Tracking: -165 dBm
- Positional Accuracy (CE50): GPS
 - 2.5 m
- Time To First Fix (@ -130 dBm): GPS
 - Hot Start:1 s
 - Warm start: 32 s
 - Cold Start: 31 s
